Cruise ships, pools, beaches and coastlines around the world: when the view offers sun and water, the Nardi lounge chairs complete the beauty.

Alfa and Omega, Eden and Tropico, are elegant lounge chairs of original shapes that assure the utmost comfort. Due to the ample experience of the past years, the lounge chairs have reached a standard of high quality and incomparable functionality which makes them even more durable in time. They are made of high quality material with a manufacturing process that respects the environment. They conform to the sector's most required normative of safety. The fabrics as well as the parts are replaceable. This is one of the many aspects that put the Nardi lounge chairs on the highest rank of the market.

Tropico lounge

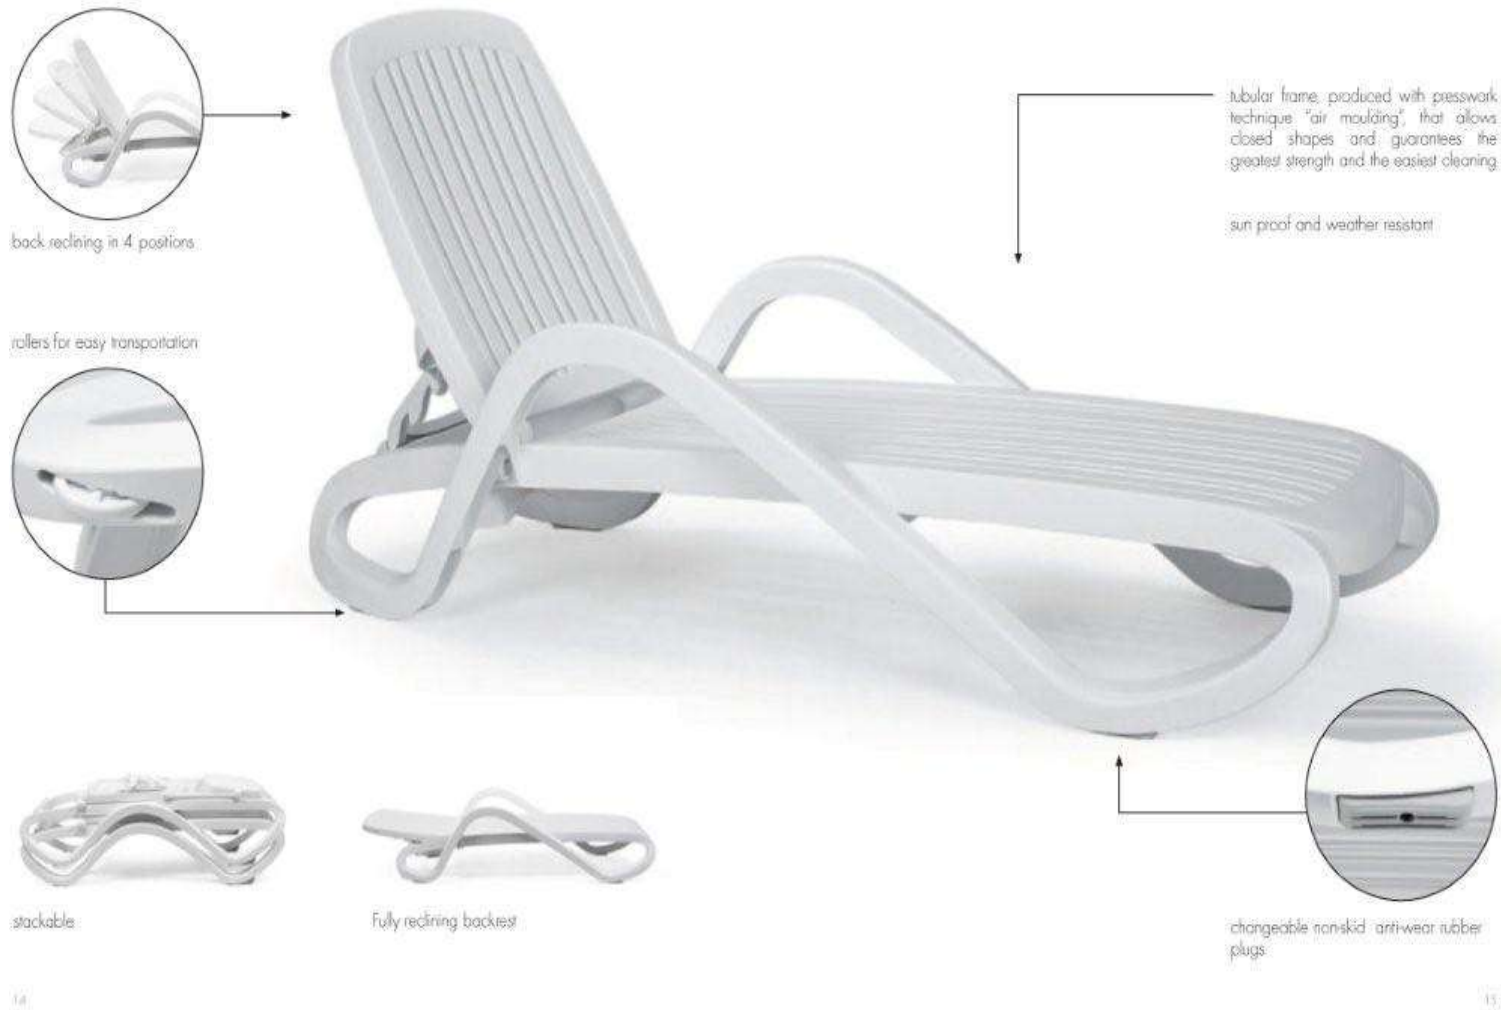

ELEVATED SEAT

The frame

Material: Highest quality polypropylene resins anti-UV, uniformly coloured

The fabric

Material: insert is made of breathable synthetic fabric (polyester fiber, pvc coated)

sunshade

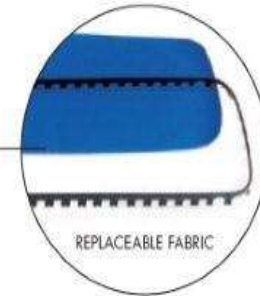

customized printing is possible; for considerable quantities it is possible to order personalized colour of structure and fabric

the micro holes make the fabric transpiring and provide a way out for humidity and water, without creating stagnant deposits, guaranteeing the human body the utmost comfort

no special maintenance is required, can easily be cleaned with water and possibly with a non aggressive detergent, such as Nardi CLEAN RESIN. Avoid contact with any type of cleaning solvents or removers

16

REPLACEABLE FABRIC

anti tear fabric fixing system; the fixing system for the Nardi fabrics is practical and durable, no elastics are used and no maintenance is needed

profile for the fixing of the fabric is produced with highly resistant material

the fabric maintains the elasticity

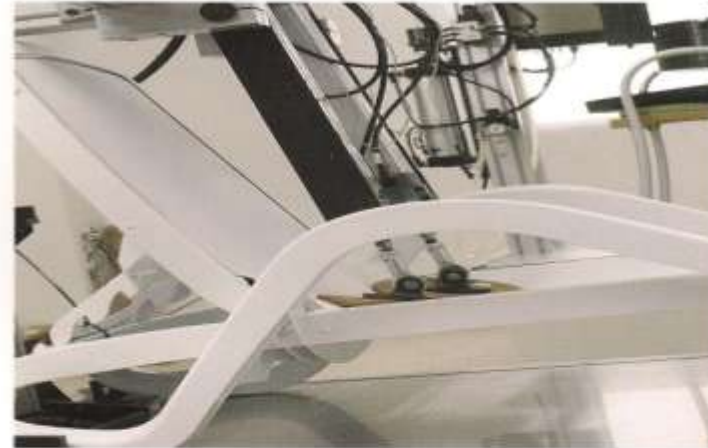

both UV and weather resistant

17

UNI test

Test in accordance with UNI EN 581/1/2/3; UNI EN 1022 regulation.
For static load test is applied a weight of 200 kg on the seat and 56 kg on the back; for 9 cycles of 30 seconds, and for a long cycle of 30 minutes. For the seat and back fatigue test is applied a weight of 100 kg on the seat and 33 kg on the back for 100.000 cycles.

CATAS®

Nardi test

Further load test made by Nardi: static load test on the seat for a weight of 500 kg; intensified fatigue test by applying on the seat a weight of 200 kg for 200.000 cycles without any defect of the fabric and the structure.
